This book is intended to be a task sequence for an undergraduate abstract algebra course that utilizes an inquiry-based learning (IBL) approach. You can find the most up-to-date version of these notes on GitHub:

<http://dcernst.github.io/IBL-AbstractAlgebra/>

I would be thrilled if you used these notes and improved them. If you make any modifications, you can either make a pull request on GitHub or submit the improvements via email. You are also welcome to fork the source and modify the notes for your purposes as long as you maintain the license below.

Here is a partial list of people (in alphabetical order by last name) that I need to thank for supplying content, advice, and feedback.

- [Joshua Bowman](#) (Pepperdine University). The Preface is a modified version of Joshua's *An IBL preface*.
- [Nathan Carter](#) (Bentley University). Nathan's excellent book *Visual Group Theory* has had a huge impact on my approach to teaching abstract algebra.
- [Anders Hendrickson](#) (St. Norbert College). Anders is the original author of the content in Appendix A: Elements of Style for Proofs. The current version in Appendix A is a result of modifications made by myself with some suggestions from Dave Richeson.
- [Dave Richeson](#) (Dickinson College). Dave is responsible for much of the content in Appendix B: Fancy Mathematical Terms and Appendix C: Definitions in Mathematics.
- [Josh Wiscons](#) (CSU Sacramento) and [Ben Woodruff](#) (BYU Idaho). In the early stages of development, Josh and Ben were instrumental the development of these notes.

Contents

Preface	4
1 Introduction	5
1.1 What is Abstract Algebra?	5
1.2 An Inquiry-Based Approach	5
1.3 Rules of the Game	6
1.4 Structure of the Notes	7
1.5 Some Minimal Guidance	7
2 An Introduction to Groups	9
2.1 A First Example	9
2.2 Binary Operations	15
2.3 Groups	18
2.4 Generating Sets	21
2.5 Group Tables	23
2.6 Cayley Diagrams	25
3 Subgroups and Isomorphisms	34
3.1 Subgroups	34
3.2 Subgroup Lattices	39
3.3 Isomorphisms	43
4 Families of Groups	52
4.1 Cyclic Groups	52
4.2 Dihedral Groups	58
4.3 Symmetric Groups	59
4.4 Alternating Groups	67
5 Cosets, Lagrange's Theorem, and Normal Subgroups	70
5.1 Cosets	70
5.2 Lagrange's Theorem	75
5.3 Normal Subgroups	76

6	Products and Quotients of Groups	79
6.1	Products of Groups	79
6.2	Quotients of Groups	83
7	Homomorphisms and the Isomorphism Theorems	88
7.1	Homomorphisms	88
7.2	The Isomorphism Theorems	91
8	An Introduction to Rings	93
8.1	Definitions and Examples	93
8.2	Ring Homomorphisms	97
8.3	Ideals and Quotient Rings	98
8.4	Maximal and Prime Ideals	101
A	Elements of Style for Proofs	103
B	Fancy Mathematical Terms	108
C	Definitions in Mathematics	110
